**Day-3**

**02/01/2024**

1) How to compare two JSON have the same propeties without order?

```
// let obj1 = {name:"person 1",age:5};  
// let obj2 = {age:5,name:"person 1"};
```

Solution:

```
let obj1 = { name: "person 1", age: 5 };  
let obj2 = { age: 5, name: "person 1" };
```

```
let str1 = JSON.stringify(obj1);  
let str2 = JSON.stringify(obj2);
```

```
if (JSON.stringify(obj1) === JSON.stringify(obj2)) {  
  console.log("The two objects are equal");  
}  
else{  
  console.log("The two objects are not equal");  
}
```

**Output:**

**The two objects are not equal**
